

Merlinus Anglicus Junior:
OR, THE
STARRY MESSENGER,
For the YEAR of our Redemption, 1752.
BEING
Bissextile, or Leap Year:
Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations.
- II. The State of the Year deduced according to Art, from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
- III. The Rising, Southing, and Setting of the Moon, and High-Water at *London Bridge*.
- IV. Tables of the Rising, Southing, and Setting of the Seven Stars, and other Fixed Stars of Note: A perpetual Table of the Rising and Setting of the Sun, Beginning and Ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year; with many other Tables pertinent for such a Work, all Accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of *Great-Britain* or *Ireland*. The like not Extant.

By HENRY COLEY, Student in the
Mathematicks and the *Cælestial Science*.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordain'd. Psal. viii. 3.

LONDON: Printed by M. READ, for the
COMPANY of STATIONERS.

A perpetual T A B L E of Day-break, Twi- light, &c. in the Latitude of London.

Greg. Account
Julian Acc.

☿ is Oriental, and rises at 2 in the Morning, ♀ and ♂ are both Occidental, and Evening Stars and sets together on the 17th Day a Quarter past 11 at Night. ♀ is Oriental, and rises the 6th Day at 56 Min. past 4 in the Morning, and 30 Min. past 4 at the End. ☿ sets with ☉ the 23d Day.

O. N. S.	D. S.	Rises	Moon	Lunar Aspects.						Observations.
				☉	☿	♂	♀	♂	♀	
1	A	4M23	9M 9				♂			This Month produceth no less than 4 Quartile Aspects, viz. Jupiter and Mercury, the Sun and Saturn. Venus with both Jupiter and Mars; this seems an Alloy to the last Month Configurations, besides the Conjunction of Jupiter and Mars in Gemini, in Opposition to Saturn in Sagitary the Ascendant of Spain; which denote great Differences amongst the Grandees of that Nation, and brings some prime Clergyman of great Note under the Relentment of his Superiors; however, amongst us, we find better Times to our Trade, which now flourishes with the worthy Merchants and other Citizens of London &c.

The most potent Aspect this Month produce, is a malevolent Opposition of the two superior Planets Saturn and Jupiter; it is a very malicious Ray, and imports much Evil to Mankind, Division and Dissentions among great ones; intemperate and hot-headed Resolutions in several Parts of the World, and that arising from a Fanatick and Deistical Disputation of Religion and Religious Ceremonies. It is Italy, and some Part of the Emperor's Dominion, that is threatened, and I wish all well in the Twin City.

June hath XXX Days.

New Moon the 1st day, at 1 in the morning.
 First Quarter the 7th day, at 6 in the afternoon.
 Full Moon the 15th day, at 6 in the afternoon.
 Last Quarter the 23d day, at 4 in the afternoon.
 New Moon the 30th day, at 8 in the morning.

OBSERVATIONS.

The Planetary Configurations of this Month are, for the most Part, benevolent; whence I do conjecture, about this Time, many deliberate and prudent Councils will be held in this Nation, as well as some other Kingdoms and Countries not far remote from us, and are now very active in Earrest to settle and compose Differences; and

Dog-days begin

in order thereunto, a great Part of this Month will be spent in Councils, and very judicious Considerations and Contrivances for the public Good.

LAUS DEO.

August hath XXXI Days.

First Quarter the 5th day, at 8 at night.

Full Moon the 13th day, at 11 at night.

Last Quarter the 21st day, at 7 in the morning.

New Moon the 27th day, at midnight.

		and sets		South		☉	☿	♂	♂	♀	♀	
1	12	8	A 2	2	A 23			☐				The Heavens appear very propitious in general, the great Troubles and Afflictions of many People, who have most severely suffer'd both in Person and Estates, do now begin to abate. Were we in England but sufficiently sensible of our own Happiness, and of the Peace and Plenty we enjoy beyond some of our neighbouring Nations, we should not only be more thankful, and admire Divine Providence, but pay Obedience to our Superiors. God direct them, and preserve this Nation from all Foreign Enemies and Domestick Traitors, now and for ever.

According to an Act of Parliament passed in the 24th Year of his Majesty's Reign, and in the Year of our Lord 1751, entitled, An Act for regulating the Commencement of the Year, and for correcting the Calendar now in Use, the Old Style ceases here, and the New takes Place; and consequently the next Day, which in the Old Account would have been the 31, is now to be called the 14th; so that all the intermediate nominal Days, from the 2d to the 14th, are omitted, or rather annihilated this Year; and the Month contains no more than 19 Days, as the Title at the Head expresses.

OBSERVATIONS.

It is to be observ'd, that the several Feast

Days, on which the Payments of Rents, Annuities, &c. depend, and also the Opening of Commons, Fields, or Pastures, are, by the Calendar estab'ish'd by the late Act of Parliament, fix'd upon the same nominal Days of the respective Months, as before in the Julian Account they were plac'd; yet the Act provides and directs, that the Payments of Rents, Annuities &c. or the Opening or Shutting of Pastures, shall not by this Means be accelerated or forwarded; but that the Days of Payment, or Right of Opening or Inclosing of Commons formerly depending on the said Feasts, are to be kept and observ'd on the same natural Days of the Year, on which the

said Feasts would have fallen, if this Account had not been made; for this Reason the 10th of October is called Old Michaelmas-day, & the 22d of November Old Martinmas-day; and so of the rest, as being the respective Days on which such Rents or Payments become due, and on which such Rights of Commons, &c. take Place, and not before.

A TABLE of some principal fix'd Stars, with the Time they rise, south, and set, either before or after the seven Stars; as also their Colour, Magnitude, and meridian Altitude, by which they may be readily discover'd.

Co- lour.	Mag.	Alt.	Names of the Stars	Rise.		South.		Sets.	
				H.	M.	H.	M.	H.	M.
♂	1	53	<i>Aldebaran, or Bull's Eye</i>	1	a 34	0	a 48	0	b 0
♂	1	29	<i>Left Foot of Orion</i>	4	31	1	31	1	34
♀	2	36	<i>Middle * in Orion's Belt</i>	4	13	1	51	0	35
♂	1	45	<i>Right Shoulder of Orion</i>	3	23	2	8	0	8
♀	1	21	<i>Sirius, the great Dog</i>	6	51	3	1	0	48
♂	2	43	<i>Procyon, the little Dog</i>	5	33	3	53	2	a 7
♂	1	30	<i>Heart of Hydra</i>	8	39	5	41	2	44
♂	1	51	<i>Regulus, Lion's Heart</i>	7	26	6	21	5	16
♀	1	54	<i>Deneb, the Lion's Tail</i>	8	42	7	54	7	7
♀	1	28	<i>Virgin's Spike</i>	12	46	9	38	6	36
♂	1	58	<i>Arcturus</i>	10	47	10	30	10	12
♂	1	12	<i>Antares, Scorpion's Heart</i>	17	36	12	39	7	42
♂	2	46	<i>Bright Star of the Vulture</i>	17	38	16	3	9	b 27
♀	1	6	<i>Fomahant</i>	1	14	19	11	10	37
♀	2	65	<i>Head of Andromeda</i>	19	43	20	19	2	56

THE brightest of the seven Stars is of the third Magnitude, and hath 61 Degrees of meridian Altitude, and in Colour participates of the *Moon* and *Mercury*.

2. The fix'd Stars all rise, south, and set about four Minutes sooner every Night, than they did the Night before. This consider'd, the exact Time of their rising, southing, and setting, for any intermediate Night, not herein noted, may be very easily deduced from this Table, by Inspection only.

To know the Time of the rising, southing, and setting of any Star in this Table, for any Day requir'd, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the seven Stars, on that Day, and you shall have your Desire; observing, that in this Table *a* stands for *after*, and *b* for *before*.

I. Great Earthquakes shall be in divers Places, and Famines and Pestilences : And fearful Sights and great Signs shall there be from Heaven.

LUKE xxi. ver. 11.

SEVERAL dreadful Earthquakes have lately happened in divers Parts of the World ; and particularly one at *Philippoli*, one of the best Cities in *Romania*, which almost swallow'd up the Place, and destroy'd 4000 Persons ; and most of the Towns and Villages in the Neighbourhood were demolished by the violent and repeated Shocks, or laid under Water by the Overflowing of the River *Mariza* : And likewise several Visitations of this Kind have been felt in this our Island, but more favourably (God be praised !) ; and we have had divers Phenomena and wonderful Prodigies, which are celestial Warnings to admonish and call us to a speedy Repentance and Reformation of the horrid and enormous Sins that are daily and boldly committed amongst us : For we are all sensible the Almighty doth execute his Judgments upon brute Creatures for our Sakes, that the People of the Earth might learn Righteousness. I shall therefore, according to my Promise in my last Year's *Anglicus*, relate in a chronological Order several Instances of this Kind, with the Consequences and Effects that attended them.

A. D. 16, as *Suetonius* reckons, was a great Earthquake at *Rome*, whereby a great Part of the City was ruin'd ; and an Inundation of the River *Tiber*, by which many People and Edifices were destroyed. Several Comets also appeared : What followed was, the Death of *Augustus Cæsar*, a great Mutiny in the *Roman* Army, and terrible Slaughters among the *Germans*, whose King *Arminius* was treacherously slain.

A. D. 66, were a prodigious Tempest and fearful Earthquake, whereby *Laodicea*, *Hierapolis*, and *Coloss*, famous Cities in *Lesser Asia*, were sorely afflicted. A Comet also appeared for six Months : There followed a terrible Persecution, in which the Apostles *Paul* and *Peter* were put to Death : And *Hermogenes* and *Phygellus* made great Apostasy and

and Schism in the *Asiatic Churches*, and appeared no other than wandering Stars, *2 Tim. i. 15*: *Nero's Supper* was burnt with Lightning: The *Britons* slew 70000 *Romans*, and in Revenge *Suetonius* destroyed 80000 *Britons* as he came from *Anglesey*: *Rome* was fired by *Nero*, and the Conflagration continued six Days together: Soon after this *Menander* and his Followers caused great Troubles among the Christians; he was an Antichrist; and probably that Person the Apostle *John* hath Respect to, as well as some others, *1 John ii. 18*. *Josephus, de Bello Judæorum, Lib. 7*, relates, in the Year 70, at the Time of the *Jews* Passover, viz. the 8th of April, in the Sign ☿ was seen a Blazing-Star like a flaming Sword over the City *Jerusalem*. *Zonaras* and *Xiphilinus* write, that many other Prodigies were taken Notice of at this Time, viz. Armies fighting in the Air, &c. These were attended with a new Emperor, viz. *Titus Vespasian*, who caused the Destruction of *Jerusalem* and the miserable Ruin and Extirpation of the *Jewish Nation* by the Sword of the *Romans*.

A. D. 105, in the Reign of *Trajan* the Emperor, there happened a terrible Earthquake, with fearful Lightnings and Thunderbolts, and excessive Storms of Wind, which did great Damage. The like happened in *Asia* in 107, with prodigious Sights in the Air: The same at *Galatia* and *Rome*, where Lightning from Heaven consumed the Temple of their Gods, Milk was rained in a prodigious Manner, and 120000 Houses were destroyed by a great Fire. In 162 the like happened in *Bithynia*, and *Smyrna* in *Asia* was quite swallowed up. Great Tyranny and Persecutions followed by *Mogul King* of the *Scots*, and the Emperors *Commodus* and *Pertinax*.

A. D. 244, a total Eclipse of the Sun, and such a horrid Earthquake that several Cities with their People were swallowed up; there was great Darkness too for several Days together: Now the tenth Persecution began, wherein 140000 Christians were put to Death in *Egypt*, and 70000 banished, and many burnt, in *Nicomedia*. In the Year 300 were great Earthquakes; thirteen Cities in *Campania* were overthrown, and one in *Asia*: At *Rome*, in the Church of *Lateran*, a Hand without a Body was seen by many People to write upon

COLEY, 1752.

upon the Wall these Words—— ‘ *Hodie Venenum in Ecclesia infusurum,*’ i. e. To-day is Poison poured into the Church; which was thought to intend the extraordinary Indulgences of *Constantine* the Great, the first Christian Emperor, to the Bishops, &c. whereby they degenerated from their primitive Simplicity and Humility.

A. D. 365, according to *Alstedius* in *Encyclopædia*, was a most prodigious Earthquake (as Historians affirm) that was perceived in all Parts of the Earth, the like never known. This was preceded by two splendid Comets. The Sea overran its Bounds, and left Ships hanging on the Tops of Houses; and there was such a fearful Inundation that many Cities and innumerable Souls perished. This was attended with *Julian* the Apostate’s War against the Christians, and the *Macedonian* Heresy, which caused great Troubles and Disturbances in the Church of *Christ*. The *Jews*, in Despite and Contempt of our Saviour’s Prophecy, wilfully attempted to rebuild a Temple at *Jerusalem*; but Fire came from Heaven, and consumed them and their Foundation: And, when *Cyril* their Bishop saw these Things done, he considered of the Words of the Prophet *Daniel*, to which *Christ* set his Seal in the Gospel, and then told them all, ‘ That now was the Time when the Oracle of our Saviour had its Accomplishment, which said, that a Stone should not be left upon a Stone in the Temple.’ Also, the Year after a cruel Persecution was begun under *Valens*, so that the Church was in great Danger of being carried away by that Flood, as *John* foretold in the *Revelations*, Chap. xii. 15.

A. D. 402, was a tremendous Earthquake (saith *Lavater*, *Ecl. Hist.* L. 8) which was preceded by a Comet like a Sword. After this *Gianus* made an Attempt upon *Constantinople*: *Stilicus* made War with and overcame the *Goths*: *Arcadius* the Emperor died: An Army of 200000 Barbarians under *Radagiso* invaded the *Roman* Empire: Now was the first Trumpet sounded, which *St. John* speaks of in the *Apocalypse*; these terrible Shakings in the *Roman* Empire being fully set forth by that of a Storm of Hail and Fire and Blood, *Rev.* viii. 7, as *Mr. Mede* interpreteth. A great Persecution against the Christians in *Persia*: Also another by the *Donatists* in *Africa* within a Year or two of this Time. A. D.

COLEY, 1752.

A. D. 409, Nicephorus relates, that a fearful Comet appear'd like a Sword in the Sign ♄, and continued blazing for four Months; and that there was a total Eclipse of the Sun, which was followed by a tremendous Motion of the Earth. The greatest Calamities followed that had been heard of in the World. All Europe, with a great Part of Asia and Africa, was overwhelmed with Judgments. A sore Drought, Famine and Pestilence, and Wars amongst the Nations, whereby infinite Numbers of Men were swept away. Rome was taken by Alaricus the Goth. Now did the second Angel sound the Trumpet, and the Roman Empire suffer a violent Death, and is therefore resembled unto a Sea made bloody by the Fall of a great Mountain all in Flame, as you may expound from Revel. viii. 8.

*A. D. 454, Sigebertus relates of a great Earthquake at Rome, another at Vienna, and in Russia, and at Constantinople, with two wonderful Blazing-Stars at the same Time. The Consequence that happened was, Attila destroyed seventy Cities in the East, and conquer'd the northern Parts; march'd with 500000 Soldiers into Germany, making fearful Devastations, and was himself slain in a Battle with Attius: Rome was sack'd by Gensericus: The Britons beat the Saxons: The Jews rebelled in Egypt, kill'd 200000 Men, and forced those that survived to eat the Dead; they slew 240000 at Cyprus, and at last were slain themselves: A great Famine in Constantinople: The Goths waste Thrace, Thessaly, and Epirus: Gratian killeth 35000 Germans: Maximinius slayeth Gratian, and possesseth Britain, France, Spain, and Afric. Thus have I prosecuted this History as far as my limited Room will permit, and conclude with that Observation of Pliny concerning Rome, who saith—*Nunquam tremuisse ut non aliquem futurum Eventum præfagiret*—That it never had an Earthquake that did not foreshew some future Event.*

Phænomena and Earthquakes do presage
That God's incensed at this wicked Age;
And dire Calamities these Signs portend—
Britannia's Sons! repent, your Lives amend.

the Ascendant; *Jupiter* in Conjunction with *Mars* in *Gemini* in the 3d House; the *Moon* in 27 Degrees of *Taurus* in the 3d, departing from the Square of *Venus*; and the next Application is to the Sextile of the *Sun* and the Body of *Mars* and *Jupiter*. These Positions do, in general, declare secret and treacherous Dealings: The Spirit of Pride and Ambition seems to be let loose in the World: And a Spirit of Fraud and fanatic Hypocrisy animates Mankind to entrap and betray one another, to the Ruin and Destruction of many. The Conjunction of *Jupiter* and *Mars* in *Gemini*, and the Opposition of *Saturn* and *Mars* in *April* from *Gemini* and *Sagittary*, and the same Aspect of *Saturn* and *Jupiter* in *May*, are violent and superior Aspects, and signify some rash and furious Actions, with great Troubles and Commotions, to happen in *Italy*, *Hungaria*, *Sclavonia*, *Spain*, and *Dalmatia*; also in *Flanders*, *Lombardy*, and *Sardinia*: And in *London* there is some Fear of Disturbance, occasioned by the restless Ambition of wicked and factious Spirits: But let us all implore the Omnipotent Being to preserve this City and Nation from Sickneſs and other impending Judgments and Calamities.

Of the SUMMER QUARTER.

THIS Quarter takes its Beginning on *Tuesday* the 9th Day of *June*, at 15 H. 42 Min. *post Meridiem*, or, vulgarly, on *Wednesday*, at 42 Min. after 3 in the Morn. At which Time 23 Degrees of *Aquarius* culminate, and 29 Degrees of *Gemini* ascend in the East; *Jupiter*, *Venus*, and *Mercury*, are in the 12th, in Opposition to *Saturn* in *Sagittary* retrograde in the 6th House; the *Sun* is in the Ascendant, and *Mars* in the 3d, entering *Leo*; the *Moon* is in 28 Degrees of *Libra* in the 5th House, separating from the Trine of *Jupiter*, and applying to the Trine of the *Sun* and the Square of *Mars*. Thus stands the Face of Heaven at the Time of this Ingress—A Position that declares the deplorable Condition and Circumstances of several Nations in *Europe*, and particularly those I mentioned in the Spring Quarter. But *Jupiter* in a Conjunction with the *Sun*, *Venus*, and

COLEY, 1752.

and *Mercury*, this Month, and in a Trine to the *Moon* at the Ingress, intimates that there are some honest and virtuous Souls who are willing to use their best Endeavours for the Peace and Tranquillity of *Europe*, and whose Interest will prevail: But treacherous Ambassies and pretended Negotiations will have too great Influence on the Transactions and Affairs of several Nations in *Europe*.

Of the AUTUMNAL QUARTER.

THIS Quarter enters on *Friday* the 22d Day of *September*, at 14 Min. past 5 in the Afternoon; when the 20th Degree of *Sagittary* is culminant, and 3 Degrees of *Pisces* are upon the Eastern Finitor; *Saturn* is on the Medium *Cali*; *Jupiter* in 13 Degrees of *Cancer* on the 5th; *Mars* in 29 Degrees of *Virgo* in the 7th House, near a Conjunction with the *Sun*, *Venus*, and *Mercury*; the *Moon* is in 20 Degrees of *Pisces* in the Ascendant, and in an Opposition to the *Sun*, *Venus*, *Mars*, and *Mercury* (in *Mundo*) and defluxing from the Square of *Saturn*, and applying to the Opposition of *Mars*. These are violent and uncommon Positions and Configurations. The Premises considered, we expect they portend a Retrogradation of all public Affairs, and great Divisions and Oppositions in Councils: The Seeds of new Calamities are sown, threatening Uproars, Seditions, and Confusion; Rapine and Devastations will appear in several Nations of *Europe*, as *Italy*, *Rome*, *France*, *Spain*, *Portugal*, &c. and this owing to the treacherous Dealings of insinuating and pretended Friends.

The WINTER QUARTER

ENTERS when the *Sun* touches the 1st Scruple of *Capricorn*, which happens this Year on the 21st Day of *December*, at 42 Min. past 8 in the Morning: At which Time 7 Degrees of *Capricorn* occupy the Ascendant, and 13 Degrees of *Scorpio* culminate; *Saturn* is in 28 Degrees of *Sagittary*, near the *Sun*, in the 12th House; *Jupiter* in 12 Degrees of *Cancer* in the 7th, in Δ to $\S$ in *Mundo* on the 11th, and in $\S$ to $\S$ in the Ascendant; the *Moon* is in 20 Degrees

COLEY, 1752.

Degrees of *Gemini*, lately separated from the Opposition of *Mars* and Trine of *Venus*, and applies to the Opposition of *Saturn* and the *Sun*. These Positions and Configurations make it a very inauspicious Ingress, propagating Discord and Divisions amongst *Grandeess*, *Prelates*, *Statesmen*, *Cardinals*, &c. But *Mars*, the *English* Patron, being angular, and in Δ to *Jupiter* and $*$ to *Venus*, portends more peaceable Proceedings to the *English* Nation than many of her neighbouring Kingdoms enjoy; for they will be made sensible of the Evils above specified before the Commencement of another brumal Ingress.

III. Of the ECLIPSES.

THERE will be only two Eclipses this Year, and both of that great Luminary the *Sun*, but neither of them visible in *England*; and they happen at the following Times, according to astronomical Computations, viz.

The first is on the 2d Day of *May*, at three Quarters past 5 in the Evening. This Eclipse will be visible and very conspicuous in the North-West Parts of the Globe.

The second is on the 5th Day of *November*, at 14 Hours post Meridiem, according to astronomical Computation; but, by the vulgar Acceptation, it is on the 6th Day, at 2 o'Clock in the Morning; so, consequently, invisible to these Islands.

THIS is to give Notice to all Dealers in Almanacks, That all Almanacks which are not Stamped and Printed for and Published by the Company of STATIONERS, at their Warehouse in Stationers-Hall, are Counterfeit; and all such Persons that shall be found Selling of such Counterfeit Almanacks, will be prosecuted by the said Company for so doing.

And whereas several Sham Predictions and Prognostications, under different Titles, without Stamps, have been Printed and Dispersed in several Parts of *England*, and Published to serve instead of Almanacks, whereby the People are greatly Imposed upon, the Company of STATIONERS much Injured, and the fair Trader Abused: The said Company promise to give a suitable Reward to any Person that shall give Information to their Clerk of the Printing or Publishing of any such Sham Prediction or Prognostication.

NATHANIEL COLE, Clerk to the Company of Stationers.

N. B. In the late Act of Parliament for Stamping Almanacks, there is a Penalty of Ten Pounds, upon all such as shall Print or Sell any Almanack, or any thing that may serve for the Purpose of an Almanack, not Stamp'd according to the Direction of the said Act.
